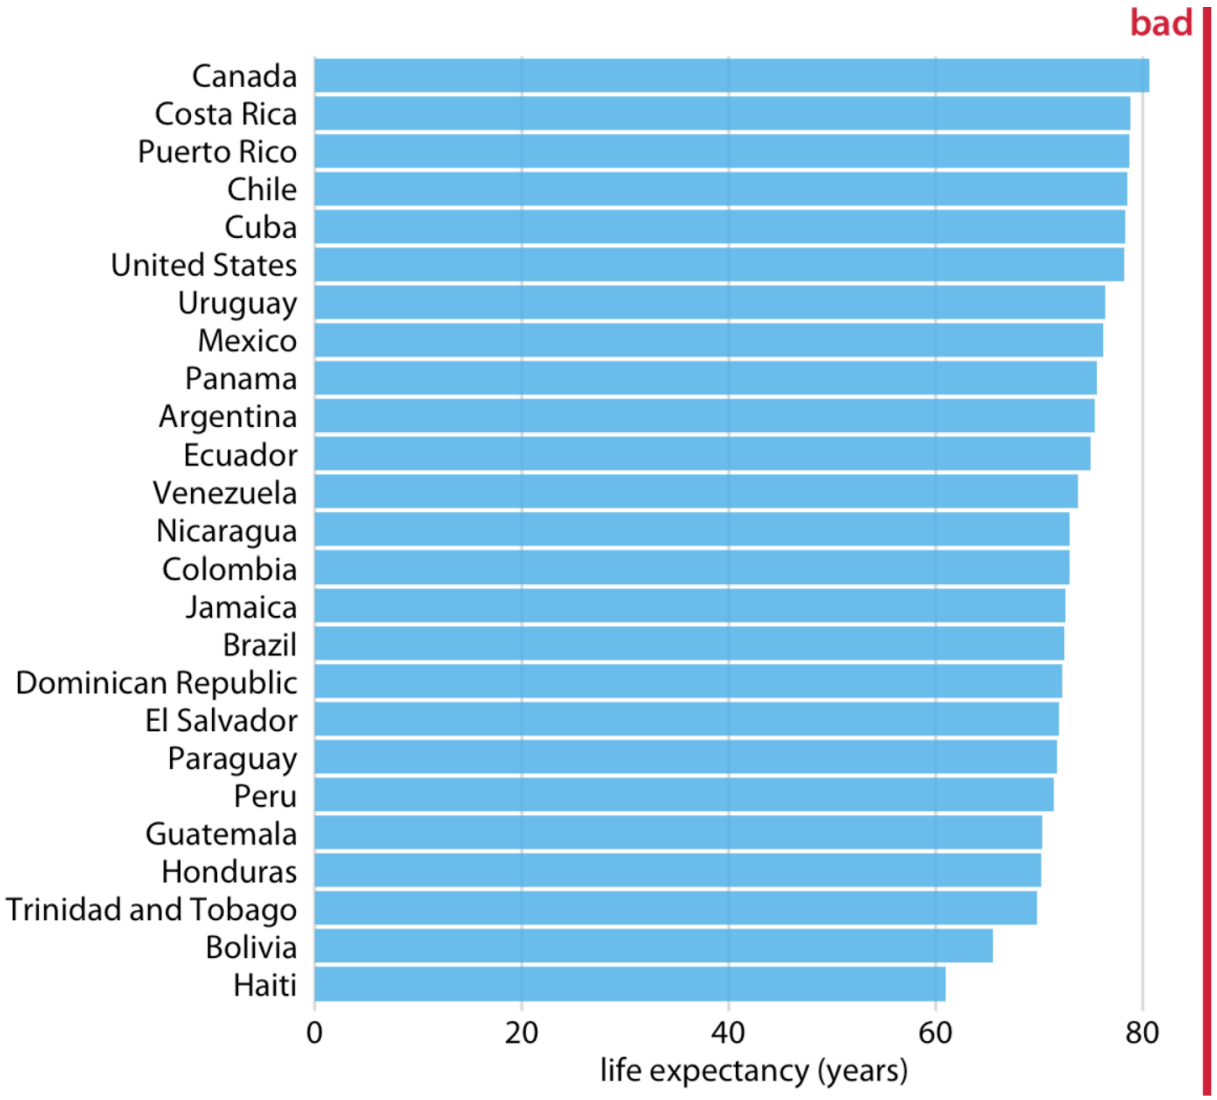
Alternatives to the Bar Graph

1. Dot Plots
2. Heatmaps

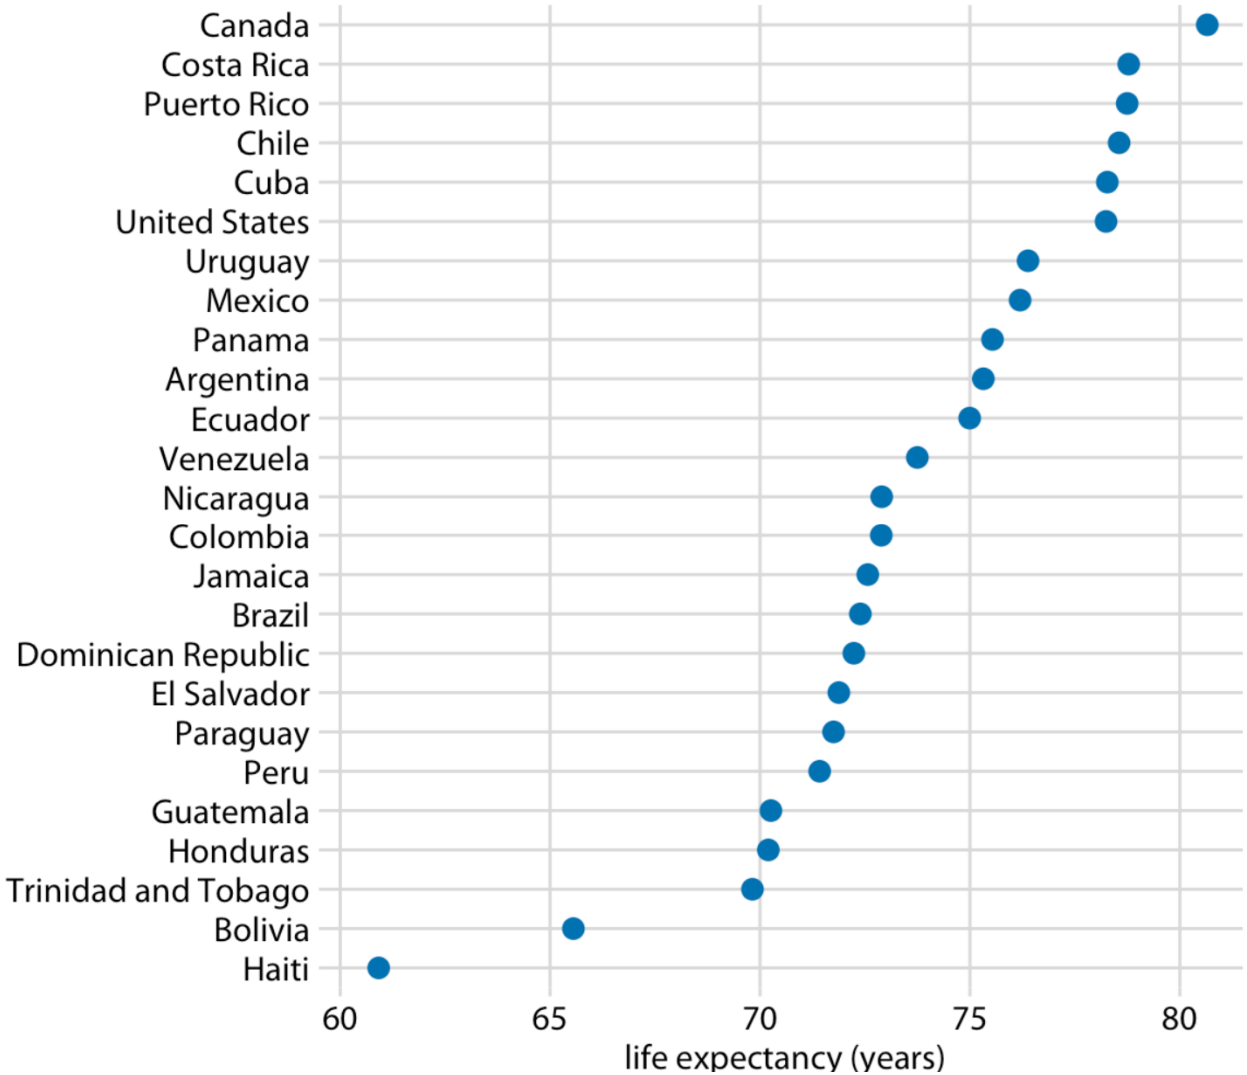
Both are useful alternatives when our categorical variable has many levels. These graphs may be able to tell a better higher level story.

At the end of the day, many of these visualization choices depend on your audience and the message you are trying to convey. There is some art that goes into the process.

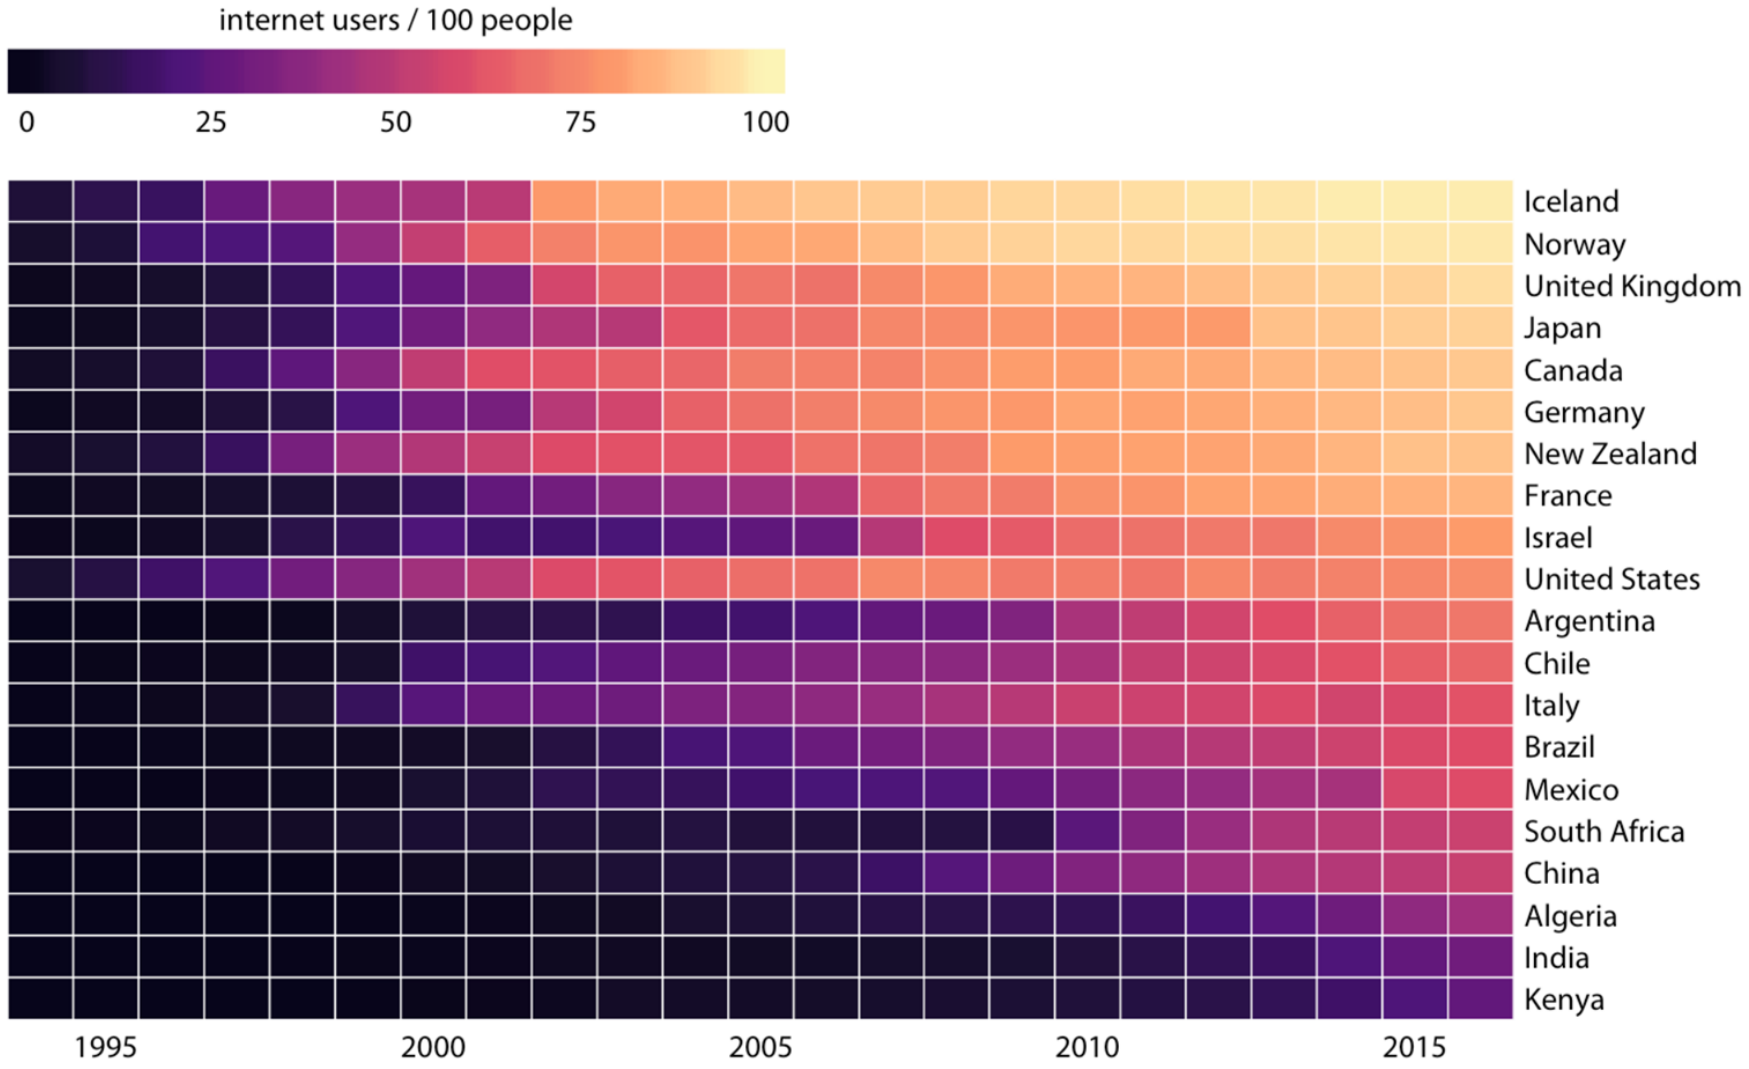
Why is this labelled “bad”?

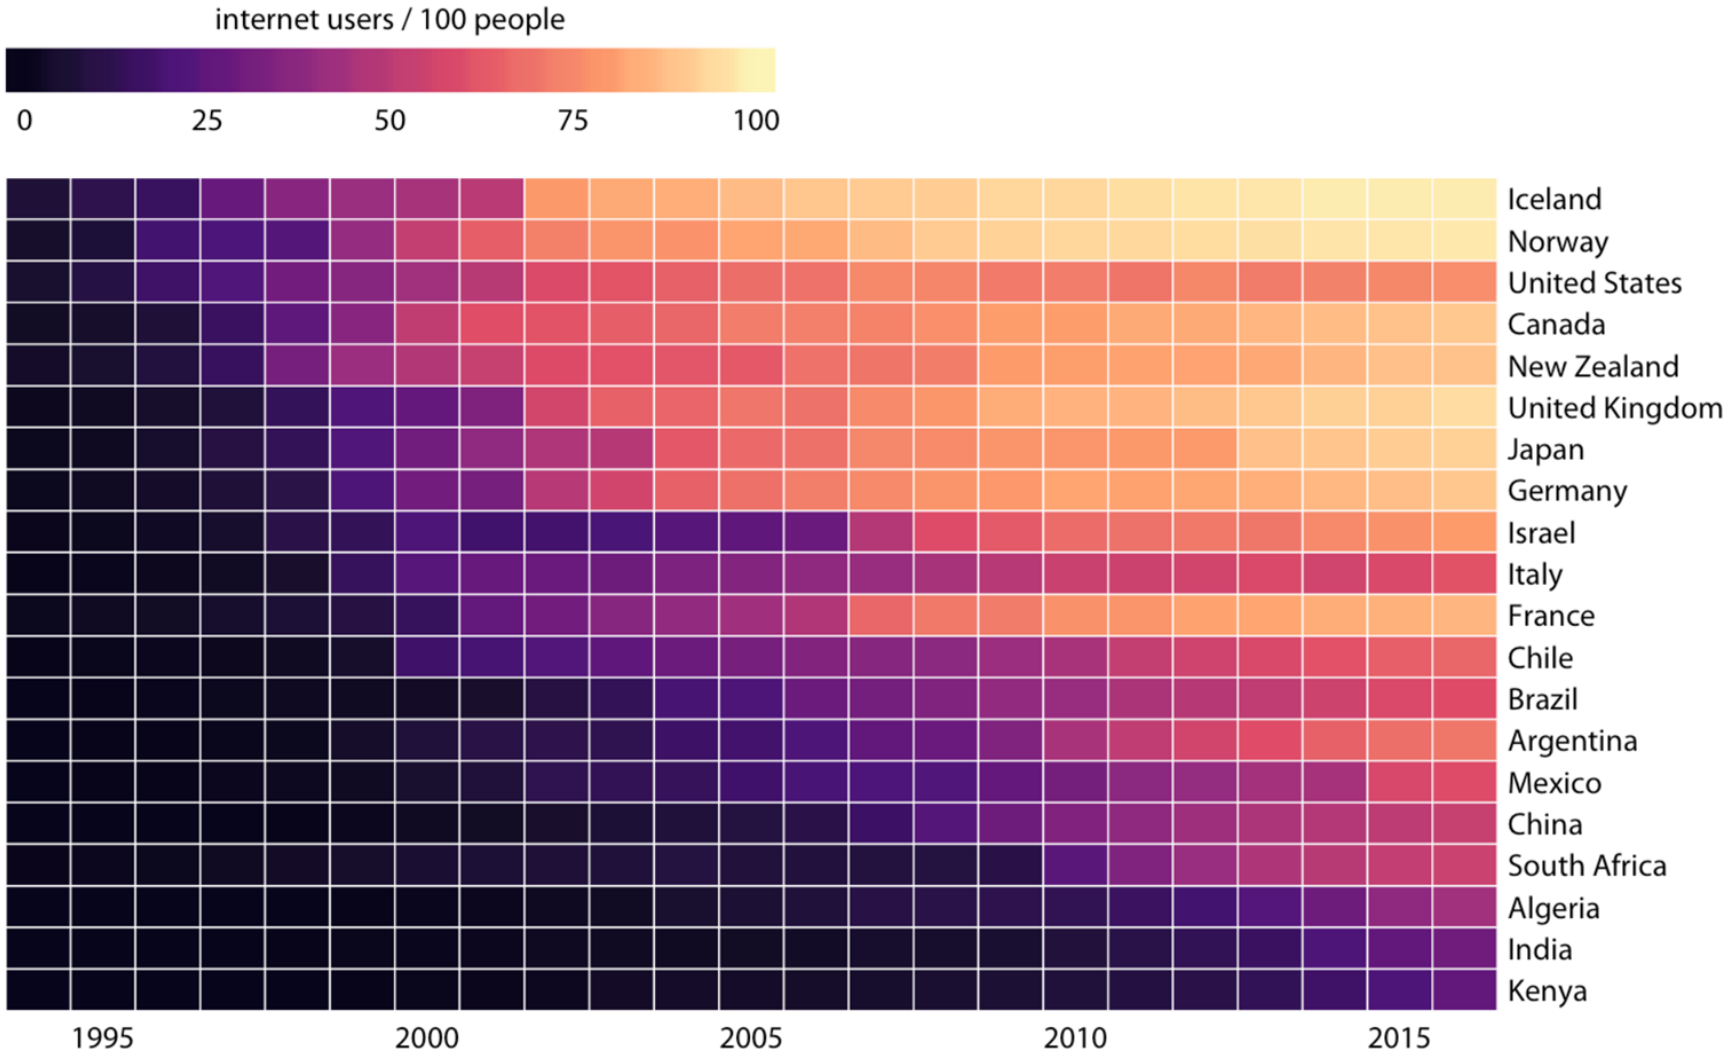


Alternative - Dot Plot



Heatmaps - Story 1





Heatmaps - Story 2
